AD-41 LBS Handgun Wide Swirl Adapter

The 0.070-inch wide swirl adapter was developed to produce a wide swirl pattern when used with an AD-41 LBS handgun. Specially-designed air manifold, air nozzle and nozzle nut help improve airflow, modify air pattern and reduce material restriction. Adapter components are made from an engineered plastic for improved insulating properties.

Available as top- or bottom-feed, AD-41 LBS model handguns incorporate a large ball-and-seat and larger flow paths for high-viscosity, filled materials and high-flow applications.

Benefits

- Achieve up to 10-inch wide spray patterns, depending on material characteristic.
- Engineered plastic components prevent heat loss, delivering more consistent spray patterns.
- Spray pattern versatility allows a range of patterns from narrow to wide to be produced.
- Simple installation of wide spray nozzle components.

How to Order

- Call toll-free: 1-888-NORDSON (1-888-667-3766)
- Fax: 1-866-667-3329
- Online: www.enordson.com

Part Number

P/N 1064918A

** Air control kit is necessary to prevent the adhesive build-up experienced by nozzle cooling*
