

Saturn[®] Solenoid Valves

Color-coded rings identify voltage and air flow to simplify solenoid replacement and troubleshooting.

Durable, high-temperature seals deliver excellent performance in demanding applications

Small Cv Saturn Solenoid

Saturn solenoids are designed specifically for Nordson pneumatic hot melt adhesive dispensing guns. These balanced, 3- and 4-way piloted valves deliver maximum shifting force in both directions by alternately supplying air to each end of the spool. Equal shifting forces at energization and de-energization result in resistance-free shifting, increased reliability and faster, more consistent response times.

Color-coded rings allow you to select the to correct replacement solenoid every time. Rings are a trademark of Nordson Corporation and are your assurance of genuine Nordson quality.

Saturn Solenoids are compatible with all Nordson pneumatic air-open/air-close (AO/AC) and air-open/spring-close (AO/SC) guns including new Classic Blue™, SolidBlue™ and SureBead® guns.

Features and benefits

- Meets Nordson requirements for hot melt adhesive application, providing peak dispensing gun performance.
- Provides superior adhesive delivery with airflows of 1.0 Cv and 1.5 Cv for multi-module valves and .18 Cv for single module valves, resulting in improved cutoff.
- Improved valve life and reduced maintenance. High-temperature seals and components withstand temperatures in excess of 200° F (93° C).
- Eliminates guesswork and minimizes risk. Saturn solenoids are designed specifically for use with Nordson pneumatic hot melt dispensing guns.

Upgrading is easy

Air-Open/Spring-Close Gun, 3-Way Solenoid Valve						
Part Number	Connectors	Inner Ring - Voltage	Outer Ring - Air Flow (Cv)	Cv	Watts	Input Voltage
1062017	1/4 NPT, QD plug, LED light, MOV	Yellow	Green	1.5	5.4	24 VDC
